

GENERATE YOUR OWN ENERGY WITH A TRAFFIC-READY SOLAR POWER PLANT

Wattway Plus is a **turnkey solar solution** installed on your transport infrastructure. **Generate your own renewable energy locally** for self consumption purposes.

By using the areas available in your car parks, pavements, cycle paths, parvis and pontoons, **you can increase your potential for self consumption.**

Wattway Plus solar panels are robust, **installed on the ground on top of a paved surface** (asphalt, concrete) and **traffic-ready for vehicles.** They can be used alone or in conjunction with other photovoltaic systems.

THE BENEFITS OF WATTWAY PLUS

Production of renewable energy with direct distribution

Optimisation of land resources

A solution for discreet architectural and landscape integration

Limits environmental impact, avoids soil sealing

Non-invasive, placed on top of existing infrastructure

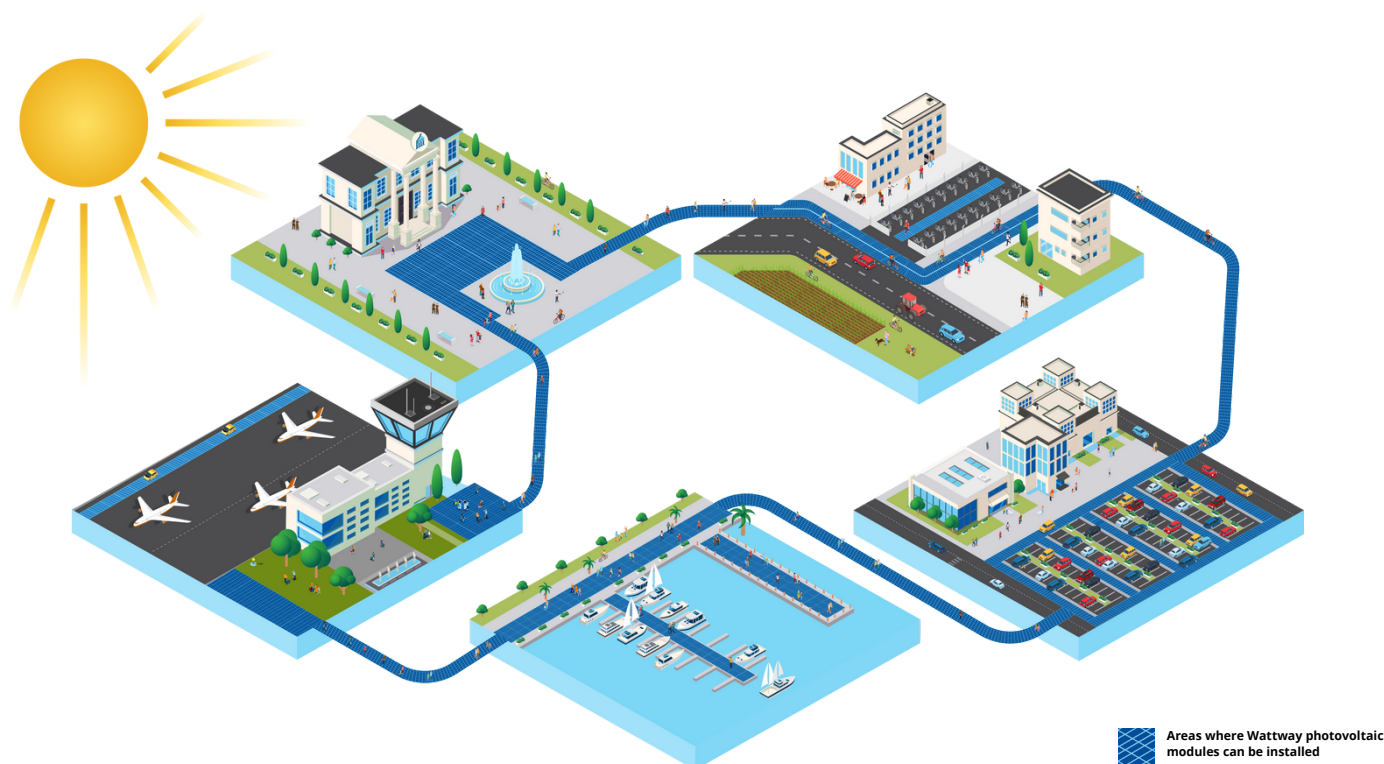

Resilient technology, resistant to traffic and extreme weather conditions

Quick: simplified administrative formalities and easy installation

WATTWAY PLUS ADAPTS TO A WIDE RANGE OF USES

Car parks, cycle paths, pedestrian walkways, parvis, forecourts, airports, pontoons and maritime quays, station platforms, emergency lanes, etc. are all areas where Wattway Plus can be installed.

“Wattway can be installed quickly. The potential of this solution is significant and will help reduce our carbon footprint. It's very positive.”

John HIBBARD - Director of Operations, Georgia Department of Transportation (USA)

A RENEWABLE AND LOCAL SOLUTION

Wattway Plus is an eco-designed solution that limits its carbon impact to 90 g eq. CO₂ per kWh produced (making it more efficient than the European and worldwide energy mixes), and produced in Europe. What's more, its recycling rate, after an estimated life of between 15 and 25 years, depending on the level of traffic (type of vehicle, flow, speed), is 99%, via a channel specifically set up for its reprocessing.

A RENOWNED PIONEER

IEC 61215

IEC 61730

The Colas Group, one of the world's leading players in transport infrastructure, now boasts unique expertise in traffic-ready photovoltaic coating technology, with more than 150 sites around the world. This know-how is the result of more than 10 years of development, in collaboration with the French National Institute for Solar Energy INES, and is protected by numerous patents. Wattway Plus modules are certified by the international IEC standard, which attests to the same level of quality and performance as traditional photovoltaic panels.
